

PIT WATER GAUGE

Water Gauge comprises two nos. 6mm straight corning glass tubes terminating into a brass block with a connecting passage. One limb is open to atmosphere & other is connected to fan drift. A tap is provided to close the connection while taking reading. A scale with adjusting screw is mounted behind the glass tubes. A spirit level helps in keeping the instrument vertical.

Operation:

- Check that bubble of spirit level is central.
- Bring Zero of scale in alignment with lower water level;
- Pressure difference between two limbs is indicated by scale reading.

Specification

- Length x Breadth x Height = 485mm x 90mm x 58mm.
- Scale range 150mm.
- Least count 1mm.
- Net weight 2.5kgs Approximate.
